Olorato Nthula

Information Systems Graduate (CIS) | Entry-Level IT Professional |
Aspiring System Analyst & IT Specialist
Gaborone, Botswana

Summary

I am a proud graduate of the University of Botswana, holding a
Bachelor's Degree in Information Systems (Computer Information
Systems). From 2021 to 2025, I built a strong foundation in software
development, system analysis, database management, cybersecurity
awareness, and IT project management-skills that prepare me to
thrive in today's fast-changing technology landscape.

During my studies, I worked on projects such as developing an
Online Fault Reporting System, which sharpened my technical
expertise in HTML, CSS, JavaScript, PHP and MySQL. These
experiences strengthened not only my technical skills but also my
ability to work in teams, communicate effectively, and manage
projects to completion under tight deadlines. My career goal is to
grow as a Business and Systems Analyst, leveraging my background
to bridge the gap between business needs and technology solutions.
I am passionate about digital transformation, problem-solving, and
delivering user-centered solutions that improve efficiency and impact
organizations positively.

I am dedicated, adaptable, and detail-oriented, with a strong interest
in continuous learning. I welcome opportunities in IT, software
development, systems analysis, and cybersecurity where I can
contribute, learn, and make an impact.

Let's connect! I am open to entry-level roles, internships, and
collaborations in Information Technology and Information Systems.

_____

Experience
